

MAR 31 1982

Docket No. 50-293

Mr. A. Victor Morisi, Manager  
Nuclear Operations Support Department  
Boston Edison Company  
M/C NUCLEAR  
800 Boylston Street  
Boston, Massachusetts 02199

Dear Mr. Morisi:

Subject: TMI Action Plan Items I.A.1.3(1) and I.C.5 As Described in  
NUREG-0737

Re: Pilgrim Nuclear Power Station

We have completed our review of the referenced NUREG-0737 items for the Pilgrim Nuclear Power Station. Our conclusions on each item are as follows:

Item I.A.1.3.(1) - Shift Manning

Boston Edison Company responded to the NRC's overtime restrictions in its letter dated December 15, 1980 to the Director of the Division of Licensing. The required implementation date for having an administrative procedure on limited overtime was November 1, 1980.

Boston Edison Company has incorporated our guidelines into Station Procedure No. 1.3.17.

We have reviewed the Boston Edison Company policy on overtime restrictions and find it to be in conformance with the guidelines of NUREG-0737. Based on this review, we find that the requirements of Item I.A.1.3(1) are satisfied and the licensee's program acceptable.

Item I.C.5 - Procedures for Feedback of Operating Experience to the Plant Staff

Boston Edison has established a system utilizing procedures (No. 1.3.33 Rev. 0 and No. 22.01 Rev. 0) which are in good agreement with the criteria in NUREG-0737. An annual audit of this system is required by a revision to the QA Manual.

PDR

SURNAME									
DATE									

Based on this review, we find the licensee's procedures for feedback of operating experience to the plant staff to be acceptable.

Accordingly, we consider that Items I.A.1.3(1) and I.C.5 are resolved for Pilgrim.

Sincerely,

Domenic B. Vassallo, Chief  
Operating Reactors Branch #2  
Division of Licensing
