

APR 8 1982

Docket No. 50-298

Nebraska Public Power District  
ATTN: Mr. J. M. Pilant, Director  
Licensing and Quality Assurance  
P.O. Box 499  
Columbus, Nebraska 68601

Gentlemen:

Your application dated July 16, 1981, requested that the Office of Nuclear Reactor Regulation (ONRR) review changes relating to the Cooper Nuclear Station maximum suppression pool temperature limit for routine startup and power operation conditions. A Class II fee of \$1,200 was remitted with this application.

When the ONRR staff completed their review of the July 16 application on July 23, 1981 and issued Amendment No. 72 to License No. DPR-46, they informed us that a Class III fee was due because the review involved a single safety issue. Through an oversight on our part, your company was never informed of this fee determination. Consequently, we are now requesting that an additional sum of \$2,800 be remitted to our office for the July 16, 1981 application. We apologize for our lateness in bringing this matter to your attention.

Sincerely,

Original Signed by:  
Reba M. Diggs
