& GENERAL COUNSEL

Director of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Attention: Mr. Domenic B. Vassallo, Chief  
Operating Reactors Branch No. 2  
Division of Licensing

Subject: James A. FitzPatrick Nuclear Power Plant  
Docket No. 50-333  
Improved Inplant Iodine Instrumentation  
Under Accident Conditions  
NUREG-0737 Item III.D.3.3

- References:
1. NRC letter, D.B. Vassallo to L.W. Sinclair dated March 17, 1982
  2. PASNY letter, J.P. Bayne to T.A. Ippolito, dated January 8, 1981 (JPN-81-5)
  3. NRC letter, D.G. Eisenhower to All Boiling Water Reactor Licensees, dated July 2, 1980

Dear Sir:

Reference 1 requested that the Power Authority identify any technical exceptions to the subject NUREG requirement. The Authority has taken no exceptions to this requirement and considers it complete for the FitzPatrick plant.

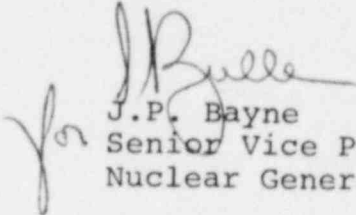

A brief description of the capability to measure iodine levels in the plant, following an accident, was provided in Reference 2. In response to Reference 3, the Power Authority submitted a request for an amendment to the FitzPatrick Operating License to include requirements for an improved inplant iodine measurement capability. This request was approved and incorporated into the Operating License as Amendment 57.
