Subject: Arkansas Nuclear One - Unit 1
Docket No. 50-313
License No. DPR-51
Proposed Technical Specifications on
RPS and ESFAS Equipment Setpoint Modifications
(File: 1510.5)

Gentlemen:

In AP&L's April 24, 1981 letter you were informed of work involving RPS and ESFAS equipment accuracies. As a result of this work B&W discovered discrepancies between revised calculations of these accurancies and those currently used for the FSAR accident analysis.

As stated in the referenced letter, B&W informally transmitted the new setpoints to AP&L and they are currently being used under administrative controls.

AP&L has now formally received the setpoint changes and therefore we are submitting the attached proposed Technical Specification Changes.

Pursuant to the requirement of 10CFR170.22, we have determined this request to be a Class III Amendment as it is a single safety issue. Accordingly, a check in the amount of $4,000 is remitted.
