Docket No. 50-339

Mr. R. H. Leasburg
Vice President - Nuclear Operations
Virginia Electric and Power Company
Post Office Box 26666
Richmond, Virginia 23261

Dear Mr. Leasburg:

SUBJECT: LICENSE CONDITIONS 2.C.(15)(b) AND 2.C.(15)(f):
NORTH ANNA POWER STATION, UNIT NO. 2 (NA-2)

We have received your letter dated April 13, 1982 (Serial No. 195a), wherein you describe your commitment to install upper-steam generator inspection ports at NA-2 as specified in License Condition 2.C.(15)(f).

The location of the upper steam generator ports as specified in your April, 1982 letter is in agreement with several recent telephone conversations between the NRC staff and your staff regarding this matter.

The Resident Inspector, Region II, for NA-2 will verify that the modifications are completed prior to startup for NA-2 which is presently in its 1st refueling outage.

By letter dated April 5, 1982 (Serial No. 200), you provided the test results for the NA-2 Natural Circulation Boron Mixing and Cooldown Test (2-ST-34) in accordance with License Condition 2.C.(15)(f). Therefore, you have met in full the stipulations of License Condition 2.C.(15)(f).

Sincerely,

Original signed by
Robert A. Clark
