

April 30, 1982

Docket No. 50-219
LS05-82-04-088

Mr. P. B. Fiedler
Vice President and Director-Oyster Creek
Oyster Creek Nuclear Generating Station
Post Office Box 388
Forked River, New Jersey 08731

Dear Mr. Fiedler:

SUBJECT: SYSTEMATIC EVALUATION PROGRAM (SEP) FOR THE OYSTER CREEK
NUCLEAR POWER PLANT - EVALUATION REPORT ON TOPICS VI-2.D
AND VI-3

By letter dated December 10, 1981, you were sent a copy of our draft evaluation of SEP Topics VI-2.D, "Mass and Energy Release for Possible Pipe Break Inside Containment," and VI-3, "Containment Pressure and Heat Removal Capability." That evaluation compared your facility, as described in Docket No. 50-219 with the criteria currently used by the regulatory staff for licensing new facilities. Also, included in that letter was a request that you inform us if your as-built facility differed from the licensing basis assumed in our assessment and comments were requested within 30 days of the receipt of that letter so that they could be considered in our final evaluation. Since no comments have been received we have concluded that our draft evaluation was factually correct, therefore, we now consider it final.

That evaluation will be a basic input to the integrated safety assessment for your facility. That assessment may be revised in the future if your facility design is changed or if NRC criteria relating to this subject are modified before the integrated assessment is completed.

Sincerely,

Dennis M. Crutchfield, Chief
Operating Reactors Branch No. 5
Division of Licensing
