MEMORANDUM FOR: Boyce H. Grier, Director, RI  
James P. O'Reilly, Director, RII  
James G. Keppler, Director, RIII  
Karl V. Seyfrit, Director, RIV  
Robert H. Engelken, Director, RV

FROM: Norman C. Moseley, Director, Division of Program  
Development and Appraisal, IE

SUBJECT: TI 2515/50, MINIMUM INSPECTION EFFORT THAT MUST BE PERFORMED  
BY RESIDENT INSPECTORS AT LICENSED POWER REACTORS

The subject TI is enclosed for immediate implementation at all operating power reactors. The original has been forwarded to the printer and will be distributed under change notice control in the near future. Following a period of trial use, the requirements of this TI will be incorporated in the routine inspection program. Any comments you may have will receive consideration as part of that effort.

This is the first of a series of actions that PD&A will take to account for the work load facing the regional staff and resident inspectors. Further measures will be taken to account for integration of TMI Action Plan into the routine program, to prioritize the overall inspection effort, and to attempt to match the program to available resources.
