

MAY 14 1982

Docket No. 50-366

Georgia Power Company
ATTN: Mr. J. T. Beckham, Jr.
Vice President - Nuclear Generation
P.O. Box 4545
Atlanta, Georgia 30302

Gentlemen:

Your application dated October 2, 1981, revised a July 22, 1977 application for Hatch Unit No. 1 regarding degraded grid voltage and provided Technical Specifications for Unit No. 2 on the same subject. The July 22, 1977 application, as revised, for Unit No. 1 and the October 2, 1981 application, as revised, for Unit No. 2 were approved by the Division of Licensing on May 6, 1982, with the issuance of Amendment Nos. 88 and 27 to Licenses DPR-57 and NPF-5, respectively.

While the July 22, 1977 application preceded the fee requirements of 10 CFR 170.22, the October 2, 1981 request for Unit No. 2 did not and is subject to fees. Based on information provided by the DL staff as a result of their final review of your application, a Class III fee of \$4,000 is due for Unit No. 2. The October 2, 1981 request for Unit No. 2 does not qualify as a duplicate Class I fee because the review for Unit No. 2 was basically an independent review since the Unit No. 1 review had been in progress for sometime when Unit No. 2 was added. Therefore, it is requested that your Company remit the sum of \$4,000 to our office for Unit No. 2.

Sincerely,

Original Signed by
Wm. O. Miller
