Mr. James R. Miller, Chief  
Standardization and Special Products Branch  
Division of Licensing  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Miller:

Attached are fifteen (15) additional copies of the responses to the first and second round questions on BAW-10147P, "Fuel Rod Bowing in Babcock & Wilcox Fuel Designs." These copies were requested by Mr. Berggren of your staff.

The original issue of the responses had some misplaced pages. The non-proprietary responses to Q1's-28, 29, 30, 31, 33, 41, 42 and 43 were placed at the rear of the non-proprietary Q2 responses. This has been corrected in these additional copies.

Very truly yours,

J. H. Taylor  
Manager, Licensing
