U. S. Nuclear Regulatory Commission
Licensing Project Manager
Office of Nuclear Reactor Regulation
Washington, D.C. 20555

SUBJECT: COMANCHE PEAK STEAM ELECTRIC STATION
SEISMIC QUALIFICATION REVIEW TEAM AUDIT

- REF: (1) Letter from Robert L. Tedesco dated
March 30, 1981
(2) TXX-3295 dated April 2, 1981
(3) Letter from Zoltan R. Rosztoczy dated
October 5, 1981
(4) NUREG-0797 Supplement 1

Dear Mr. Burwell:

In reference (1), the NRC staff provided a request for additional information and tentative schedule for the Seismic Qualification Review Team (SQRT). The CPSES responses to this request for additional information was provided on April 2, 1981 by reference (2). These responses were documented in the CPSES/FSAR in Amendment 17 dated April 7, 1981.

On April 20, 1981, CPSES was informed that the audit had been delayed until June 1981, and on May 11, 1981, CPSES was informed that in the judgement of the NRC staff, a sufficient percentage of equipment was not available for inspection on site and the audit had been cancelled. CPSES requested a meeting with the Seismic and Dynamic Loads Section of the Equipment Qualification Branch to demonstrate to the NRC staff that the procedures and methodologies being employed by CPSES in this area were adequate and acceptable and that seismic qualification could be closed out except as a confirmatory issue which would be completely closed out after the NRC staff completed the SQRT audit.

on shelf

This meeting was held on August 4, 1981, and was documented by the staff in reference (3). Although no major disagreements or deficiencies surfaced during the meeting, the NRC staff kept

8205270481A

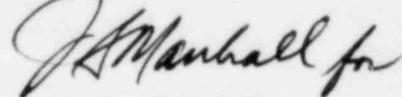

Seismic and Dynamic Qualification as an outstanding issue instead of a confirmatory issue (see reference (4)).

Attached to this letter is a resubmittal of the equipment summary which incorporated the comments received from the NRC staff. As shown on this summary, CPSES has a significant amount of equipment qualification documentation complete and equipment installed on site to support a SQRT audit. The following tentative schedule is proposed.

CPSES submit summary information	-	attached
Staff select equipment to be audited	-	6-18-82
CPSES submit "Qualification Summary of Equipment" on selected equipment	-	7-23-82
SQRT Site Visit	-	8-09-82

Please let us know as soon as possible if you can support this schedule.

Respectfully,

H. C. Schmidt
