Dear Sir:

Louisiana Collection, Library, University of New Orleans, is a major depository for all materials pertaining to the growth and development of Louisiana. In particular, we are interested in environmental impact statements. It is our understanding that your department may issue environmental impact statements on projects to be located in Louisiana or on projects which have already begun in this state. We would ask you, if it is at all possible, for copies of these environmental impact statements so that our holdings may most accurately reflect Louisiana's growth and development.

Thank you very much for your time and cooperation.

Sincerely,

Kenneth E. Owen, Head
Louisiana Collection
