To: James H. Carpenter, Administrative Judge Atomic Safety and Licensing Board

From: John Runkle, Executive Coordinator Conservation Council of North Carolina

Re: Response to Memorandum dated May 14, 1982

We agree that it is unlikely that your prior relationship with Carolina Power and Light Company should interfere with your judgment in the Shearon Harris Nuclear Power Plant OL proceeding (Docket Nos. 50-400 and 50-401). However we would like to reserve our right to question your participation if something unexpected arises.

Thank you for your disclosure.

In the matter of CAROLINA POWER & LIGHT, ET AL.	Docket Nos. 50-400 50-401
Shearon Harris Nuclear Power Plant)	May 24, 1982

CONSERVATION COUNCIL'S RESPONSE TO APPLICANTS' MOTION FOR EXTENSION OF TIME

The Applicants' Motion for Extension of Time dated May 18, 1982, requested that the Applicant be allowed additional time to respond to the various Supplements to Intervene by the petitioners. We agree that an extension for the Applicants' response would be reasonable, and that June 7 would give them adequate time. At that time, we would like to be served in person, leaving it to the Applicant and ourselves to come with some mutually agreeable method of service at that time.

It was however our understanding that the NRC Staff's response which was to be filed on June 7 would include not only the Staff's response to the contentions filed by the petitioners but also would include the Staff's response to the Applicants' response. We do not feel that the Licensing Board would fully benefit from the Staff's response unless it also gave ample consideration to the Applicants' response. Regardless of the Staff's apparent willingness to file on the same day as the Applicant, we feel that as complete written responses are essential to the Licensing Board's consideration of the supplemental

Se 8206040079

petitions, the Board should require the Staff to consider the Applicants' response before they file their own response.

However, if the Applicant is allowed an extension in which to file its response, the petitioners will not have adequate time in which to prepare for the special prehearing conference. Instead of having from May 28 to June 14-15 to respond to the Applicants' response and from June 5 to June 14-15 to respond to the Staff's response, the petitioners will only have seven days to respond to both. This will place a serious burden on the petitioners, many of which are volunteers and can only respond to and research during off-work hours. I myself only work parttime for the Conservation Council and would be hard pressed to establish factual and legal arguments in response to the Applicants' response.

As a result of the burdens placed on us by the reasonable extension of time requested by the Applicants, we move that the special prehearing conference be moved to June 28-29 or later, or that, at a minimum, the petitioners be allowed ample time after the prehearing conference in order to respond fully to both the Applicants and the Staff before the Licensing Board issues its Memorandum and Order (Reflecting Decisions Made Following Prehearing Conference).

Respectfully submitted,

John Runkle
