P.O. Box 968 3000 George Washington Way Richland, Washington 99352 (509) 372-5000

G03-82-529

Docket No: 50-508

May 25, 1982

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Denton:

Subject: NUCLEAR PROJECT 3 - APPLICATION FOR OPERATING LICENSE

Pursuant to 10CFR2.101(a) and 50.30, the Washington Public Power Supply System (Supply System) is filing herewith its Application for an Operating License for Nuclear Project 3 (WNP-3). Authorization for the construction of this project is set forth in Construction Permit CPPR-154 issued by the NRC on April 11, 1978.

In accordance with 10CFR50.30(c)(3), the following Operating License submittals for this Project are enclosed:

- Ten (10) copies of the general information required by 10CFR50.33;
- Fifteen (15) copies of the Final Safety Analysis Report (FSAR) including the Emergency Preparedness Plan required by 10CFR50.34 and 50.34a;
- Twenty (20) copies of the Environmental Report required by 10CFR Part 51.
- Five (5) copies of a document entitled "Information for Antitrust Review of Operating License Application" requested by NRC Regulatory Guide 9.3.

When NRC deems the tendered Application to be acceptable and complete for docketing, we will submit the additional copies of these documents as required by 10CFR50.30.

The antitrust information confirms that there have been no significant changes in our activities subsequent to completion of the construction permit antitrust review of this Project, and confirms the conclusions in the favorable advice letters rendered by the Attorney General at that time.

Submittal rec'd w/out Antitrust portion

WNP-3 - Application for Operating License

10CFR50.34(f) establishes a requirement for Operating License Applications to include an evaluation of the facility against the Standard Review Plan (SRP). At the time this rulemaking was promulgated, the WNP-3 Application was in the final publication process and it was not feasible to include this information in the documents now being tendered. Discussions with the NRC Licensing Branch have indicated the acceptability of providing the required information in the docket version of the FSAR and subsequent amendments. We see no reason for the absence of this material to be cause for rejection of the Application.

Additionally, per discussions with the NRC staff, three copies of the FSAR are being forwarded under separate cover to EG&G Idaho for their usage in performing the acceptance review.

Sincerely,

G. D. Bouchey, Deputy Director  
Safety and Security
