Subject: [External_Sender] NRC Hearing on Indian Point
Date: Sunday, February 16, 2020 9:33:16 PM

To whom this may concern; A public meeting for license transfer needs to be held in Westchester.

We are involved citizens and are entitled to this information.

Holtec has a criminal record and should not be allowed to do business in New York. They manufacture the casks they want to use for high level radioactive waste storage. They have thin walls and are inferior to thicker walled casks used abroad. Quick and cheap is how they have done business. There is no reason to think it will be any different at Indian Point.

Decommissioning Indian Point is not business as usual. It is the long term health and safety of the Hudson River Valley and the lives of 20 million people who live and work in the area surrounding the reactors. Kind Regards, John Cavuoto
