J. R. Sears, Reactor Inspector

U. S. ARMY MATERIALS RESEARCH AGENCY (WATERTOWN ARSENAL)
CO REPORT NO. 47/66-2

Here's a report on a visit to the Watertown Arsenal reactor. I continue to be favorably impressed with this operation. Even though Messrs. Dady and Stanton are job-hunting, morale is good because the whole crew respects Mr. O'Connor.

I have been asking them for some time how they would know if their underground concrete storage tank for liquid wastes was leaking. You will note that they have now bought liquid level indication equipment.
