

UNITED STATES GOVERNMENT

Memorandum

DATE: SEP 11 1963

TO : Eber R. Price, Assistant Director
Division of Licensing and Regulation

FROM : *L. Kornblith, Jr.*
L. Kornblith, Jr., Assistant Director
for Reactors
Division of Compliance

SUBJECT: U. S. ARMY MATERIAL RESEARCH AGENCY
DOCKET NO. 50-47

ATTN: R. G. Page (3)

Attached is a report by our field inspector of a visit to the subject facility on July 22-23, 1963. No items of noncompliance were observed during this visit.

You will note from the report that the licensee at this facility relies on administrative control to prevent fission chamber movement during control rod withdrawal. We are of the opinion that consideration should be given to the use of an interlock in this case.
