Docket No. 50-346
License No. NPF-3
Serial No. 829
June 21, 1982

Director of Nuclear Reactor Regulation
Attention: Mr. John F. Stolz
Operating Reactor Branch No. 4
Division of Operating Reactors
United States Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Stolz:

Under separate cover, we are transmitting three (3) original and forty (40) conformed copies of an application for Amendment to Facility Operating License No. NPF-3 for the Davis-Besse Nuclear Power Station Unit No. 1.

This application requests that the Davis-Besse Nuclear Power Station Unit 1 Technical Specifications, Appendix A, be revised to reflect the changes attached. The proposed changes involve Technical Specifications relating to Cycle 3 reload report (BAW-1707 February, 1982, submittal March 5, 1982, Serial No. 787.)

The proposed change concerns the Reactor Protection System response time which was inadvertently omitted in the Cycle 3 reload report.

This amendment request involves a change to a previous submittal. Therefore, no fee is incurred.

Very truly yours,

A handwritten signature in cursive script, appearing to read 'R. P. Crouse'.
