

JUN 4 1982

Docket No. 50-298

Nebraska Public Power District
ATTN: Mr. Jay M. Pilant
Division Manager of Licensing
& Quality Assurance
P.O. Box 499
Columbus, Nebraska 68601-499

Gentlemen:

We have received a copy of your application dated April 30, 1982, which was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. This application related to certain Technical Specification changes to incorporate conservative values so that future reload analyses can be done under the provisions of 10 CFR 50.59 and to more fully reference applicable approved General Electric topical reports for the Cooper Nuclear Station. A Class II fee (\$1,200) was submitted with your application pursuant to 10 CFR 170.22.

Based on information provided by the ONRR staff as a result of their preliminary review, it has been determined that a Class III fee (\$4,000) is appropriate for that portion of the April 30 application relating to changes in the safety limits since the review will involve consideration of a single safety issue. The Class II fee (\$1,200) is appropriate for the remaining portion of the application. Therefore, you are requested to remit an additional sum of \$4,000 to this office. If the final review of your application reveals that these fees are not correct, you will be notified and any necessary adjustments will be made.

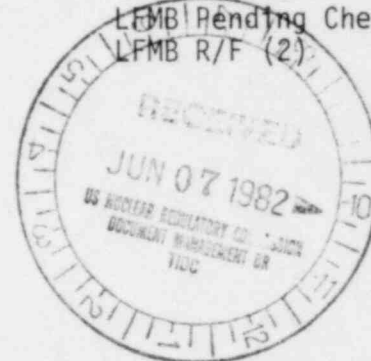

Sincerely,

Original Signed by:
Reba M. Diggs
