G. D. McLENDON
Senior Vice President

W3K-82-0368
Q-3-A35.07.35

Mr. John T. Collins, Regional Administrator, Region IV
U. S. Nuclear Regulatory Commission
611 Ryan Plaza Drive, Suite 1000
Arlington, Texas 76012

SUBJECT: Waterford SES Unit No. 3
Docket No. 50-382
Significant Construction Deficiency No. 35
"Material Properties of Tube Track and Welded Fittings"
Fourth Interim Report

Reference: 1) LP&L Letter W3K-82-0155 to USNRC dated March 18, 1982
2) Telecon - L. Bass (LP&L) to L. Martin (USNRC) on June 22, 1982

Dear Mr. Collins:

In reference (1), LP&L committed to submit a final report on Significant Construction Deficiency No. 35 on June 21, 1982. Because of complications experienced by the contractor, Mercury Company, this report will not be submitted until November 15, 1982.

The reason for the change in submittal date is that Mercury Company has had to increase their efforts required to assure release of certain Start-up systems. This has resulted in added time requirements to complete tube track rework and system walkdown.

Very truly yours,

G. D. McLendon
