De Nuzio Palladino, Chairman
Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

The Indian Point Nuclear Power Plants should be closed. The fact that evacuation plans in case of accident are proposed prove they are unsafe.

Thousands of people who live near the plants; plus thousands of others who visit this area of state parks and nearby West Point could not possibly be evacuated efficiently considering the terrain, the roads, lack of transportation, only volunteer fire and ambulance corps. What's the point?

The point is: Indian Point must be closed, abandoned as the mistake it is.

Let us be sensible. Work on many other kinds of energy sources: Solar, water, coal only with pollution control. Conscious consumers also conserve.

Sincerely yours
Joy Cabri
