July 9, 1982

Mr. A. Schwencer, Chief
Licensing Branch #2
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: LaSalle County Station Units 1 and 2
Concerns Regarding the Adequacy of the
Design Margins of the Mark I and II
Containment Systems
NRC Docket Nos. 50-373 and 50-374

Reference (a): R. L. Tedesco letter to L. O. DelGeorge
dated July 2, 1982, same subject.

Dear Mr. Schwencer:

Reference (a) requested that Commonwealth Edison Company provide a proposed schedule for submitting a program to address those concerns which the NRC staff has identified as being potentially applicable to LaSalle County Station. The purpose of this letter is to provide the requested information.

Commonwealth Edison Company has participated in various BWR owners group meetings on this subject, and in telecons and meetings with the NRC staff. We have already performed a brief qualitative review which concluded that the concerns were not applicable to LaSalle County Station. We also have initiated a detailed review of the concerns. Based upon Reference (a), we will limit our review to those items specified as potentially applicable to LaSalle. We currently expect to submit a report on this subject by September 1, 1982 (two months after the date of Reference (a)).

If there are any further questions on this matter please contact this office.

Very truly yours,

CW Schroeder 7/9/82
