MIDLAND PROJECT
MIDLAND DOCKET NO 50-329, 50-330

Included herewith are documents referenced in our "Response to Interrogatories" dated July 12, 1982. Except as otherwise indicated, all documents referred to in the Response to Interrogatories, as well as documents specifically indicated as "attached" to the Responses, are included in this submittal. For ease of reference, we included an "Index to Documents Referenced in Consumers Power Responses to Sinclair Interrogatories" with our July 12 Response. This index lists the documents (in order of presentation in this submittal) together with cross references to contentions to which they pertain.

A point of clarification regarding our response to interrogatory 30: Our response states that the issues raised in contention 51 (pertaining to task B-52) are not unresolved safety issues. We note that task B-52, while not itself an unresolved safety issue, has been incorporated in task A-2, which is indicated as having technical resolution complete in NUREG 0606 (Vol. 4, No 1, p.6), and is further discussed in our response to interrogatory No. 8.
