

MAY 1 1989

Docket No: 40-8724

NOTE TO FILE:

CONFERENCE CALL CONCERNING CHEMETRON'S HARVARD AVENUE SITE, APRIL 26, 1989

Participants:

NRC: Leland Rouse, Jerry Swift, Donald Gibbons (R111) and Gerry LaRoche,
Oak Ridge Associated Universities (ORAU): Jim Berger
REMCOR (consultants to Chemetron): Earl Rothfuss, Bill Needwood, Don Adams
and Marie Knappe.

Topics Discussed:

Decontamination began 2 weeks ago, 5500 ft³ of soil excavated and stored in drums;

Some rubble encountered, will try to decontaminate rather than shipping entire pieces to a disposal site;

Performing a grid point by grid point survey;

Soil samples taken and sent to laboratory for analysis, Remcor will provide split soil samples for analysis by ORAU; leaving holes open until satisfied with calibrations.

On adjoining property an ALCOA plant is being dismantled; it formerly processed thorium;

Calibration of instruments used by onsite technicians;

Week of May 22nd scheduled for onsite verification by ORAU of Remcor's decontamination effort;

Remcor may contact ORAU directly with any concerns;

As work on Harvard Avenue site is completed, Remcor will transfer crew to Bert Avenue (Dump) site. Clean up of this site will begin in southeast corner using the same methods as are being used on Harvard Avenue site.
