License No. 52-14931-01  
Docket No. 03008264  
Control No. 617674

**PLEASE CONFIRM RECEIPT OF THIS REQUEST FOR ADDITIONAL INFORMATION BY RETURN EMAIL**

Dr. Medina-Pizarro,

This is in regards to your letter dated February 12, 2020 whereby you notified the US Nuclear Regulatory Commission of your intent to transfer ownership (i.e. change of control) of C.T. Radiology Complex & MRI Institute to Bayamón Imaging and Interventional Institute LLC. In order for us to continue our review we need the following additional information:

Licensees must provide full information and obtain NRC's ***prior written consent*** before transferring control of the license. If any items are not applicable, so state.

1. Describe any planned changes in the organization, including but not limited to, transfer of stocks or assets and mergers, change in members on Board of Directors, etc. Provide the new licensee name, mailing address, and contact information, including phone numbers.
2. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for new personnel and any changes in the training program.
3. Describe any changes in the location, facilities, equipment, radiation safety program, use, possession, waste management, or other procedures that relate to the licensed program.
4. Describe the status of the licensee's facilities, equipment, and radiation safety program, including any known contamination and whether decontamination will occur prior to transfer. Include the status of calibrations, leak tests, area surveys, wipe tests, training, quality control, and related records.
5. If current decommissioning funding plans (DFP) will be changed as a result of the transfer, the revised DFP should be submitted. If other financial assurance documents will be changed as a result of the transfer, confirm that all financial assurance instruments associated with the license will be held in the transferee's name before the license is transferred, and as required by 10 CFR 30.35(f), the licensee must, within 30 days, submit financial instruments reflecting such changes.
6. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.
7. Confirm that both transferor and transferee agree to transferring control of the licensed material and activity, and the conditions of transfer, and that the transferee has been made aware of any open inspection items and its responsibility for possible resulting enforcement actions.
8. Confirm that the transferee will abide by all constraints, conditions, requirements, representations, and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.

9. In order for the NRC to determine if this change of control is to a “known entity,” please indicate if Bayamón Imaging and Interventional Institute LLC possesses any NRC or Agreement State licenses; if it does please provide a copy.

We will continue our review upon receipt of the requested information. Please respond within 30 days of the date of this request. You may respond to my attention by letter, email (if the letter is signed by senior management and scanned into a pdf format), or fax (610-337-5269), referencing mail control number 617674. If you have any questions regarding this deficiency request, please contact me at (610) 337-5182.

Current NRC regulations and guidance are included on the NRC’s website at [www.nrc.gov](http://www.nrc.gov); select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits**, **see our toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

Regards,

Robert L. Gallagher
