1. 10 CFR 73.71(c) states in part, "Each licensee...shall notify the NRC Operations Center...as soon as possible, and in all cases within one hour, of any event which significantly threatens or lessens the effectiveness of a physical security system as established by...the licensee's approved physical security plan."

The licensee's approved security plan, dated July 19, 1974, paragraph II.C.1. states in part "An intrusion alarm system is installed at the facility providing warning of unauthorized entry....the system ...indicates any circuit break to a central read-out in the police department."

Contrary to the above, the licensee failed to notify the NRC Operations center within one hour of the complete loss of intrusion alarm annunciation in the campus police department on approximately April 1, 1982. The licensee reported the loss of alarm annunciation to the NRC Regional Office on May 10th, 1982.

This is a Severity Level IV Violation (Supplement III).

2. 10 CFR 73.71(c) states in part, "The licensee shall submit a written report to the appropriate NRC Regional Office...describing the event in detail within 5 days of the time of discovery."

Contrary to the above on May 1st, 1982 the reactor supervisor became aware of the loss of the intrusion alarm annunciation to the campus police department, and a written report to the NRC Region V office was prepared on June 1st, 1982, and submitted on June 7th, 1982.

This is a Severity Level IV Violation (Supplement III).
