CONSUMERS POWER COMPANY - TOPICAL REPORT CPC-2A - REVISION 1
QUALITY ASSURANCE PROGRAM DESCRIPTION FOR OPERATIONAL NUCLEAR POWER PLANTS

Consumers Power Company letter of March 4, 1982 submitted an approved Topical Report CPC-2A, "Quality Assurance Program Description for Operational Nuclear Power Plants." This letter transmits a revision to CPC-2A to incorporate changes pertaining to our new coordinated approach to the safety management function as described in our letter dated July 20, 1982, organizational changes and editorial changes. Consequently, approval of CPC-2A, Revision 1 will be contingent on NRC acceptance of Technical Specification Change Request of July 20, 1982.

The appropriate sections of a draft revision to CPC-2A were attached to our letter of July 20, 1982. Those sections have not been revised since July 20, 1982 and are incorporated into CPC-2A, Revision 1. All changes to CPC-2A, Revision 1 are identified by vertical lines in the right hand margin and the significant changes are stated in Attachment A of this letter.

Since Topical Reports are classified as Category F documents under 10 CFR 170.21 a fee has not been transmitted at this time.
