Docket No. 030-05610
Docket No. 030-05611

Dear Mr. Stephens:

This refers to the routine safety inspection conducted by Mr. J. L. Cameron of this office on November 3, 1993, of activities authorized by NRC Byproduct Material Licenses No. 34-00255-03 and No. 34-00255-06G, and to the discussion of our findings with you and Dr. J. Dukes at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described in your letter dated June 19, 1992, regarding apparent violations found during our April 29, 1992 inspection. We have no further questions regarding these matters.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

200056

B. J. Holt, Chief
