Brownville, Nebraska 68321

SUBJECT: NRC INSPECTION REPORT 50-298/93-27

This refers to the inspection conducted by Mr. J. L. Pellet of this office and other personnel identified in the enclosed report from November 29 to December 10, 1993. The inspection included an assessment of the qualifications of individuals who are licensed to operate your Cooper Nuclear Station facility and the licensed operator requalification or continuing training program and followup of selected previously identified open inspection items and violations. At the conclusion of the inspection, findings of significance were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of evaluation of the licensed operator requalification training program by evaluation of the comprehensive written and operating examinations submitted for review and of licensed individuals by the use of comprehensive written and operating examinations jointly administered in accordance with NUREG-1021, "Operator Licensing Examiner Standards," Revision 7. The results of this inspection are documented on pages 1 and 2, in the enclosed report.

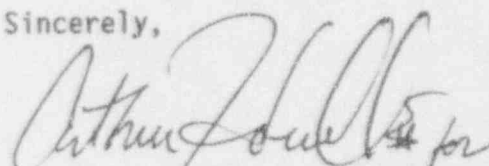

Based on these results, all but one of the licensees evaluated demonstrated adequate competency and all examinees have been informed of their individual results by letter. Further, based on these results and the corresponding observations during the joint administration, the Cooper Nuclear Station facility licensed operator requalification training program is evaluated as satisfactory in accordance with NUREG-1021, "Operator Licensing Examiner Standards," Revision 7.

In accordance with 10 CFR Part 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
