

Docket Nos. 50-317  
50-318

DEC 21 1993

Mr. Robert E. Denton  
Vice President - Nuclear Energy  
Baltimore Gas and Electric Company  
Calvert Cliffs Nuclear Power Plant  
1650 Calvert Cliffs Parkway  
Lusby, Maryland 20657 - 4702

Dear Mr. Denton:

SUBJECT: REACTOR AND SENIOR REACTOR OPERATOR LICENSING INITIAL  
EXAMINATIONS - CALVERT CLIFFS

In a telephone conversation on December 16, 1993, between Mr. Niedzielski and Mr. James Prell, arrangements were made for the administration of licensing examinations at the Calvert Cliffs Nuclear Power Plant.

The written examinations are scheduled for the week of April 25, 1994. Your staff will be given an opportunity to review the licensing examinations in accordance with the guidelines in NUREG-1021, "Operator Licensing Examiner Standards," ES-201, Attachment 4, during the week of April 4, 1994.

We appreciate the effort your staff made in furnishing and updating the reference materials required by ES-201, Attachment 2. Your staff will also have to furnish duplicate reference material by January 25, 1994, to the NRC contractor.

The NRC will prepare and administer the written examinations in accordance with ES-401 and ES-402 of NUREG-1021. In order to conduct the requested examinations, it will be necessary for your staff to provide adequate space and accommodations on the date noted above. The NRC's guidelines for administering the written examinations are described in ES-402, Attachment 1.

The NRC will prepare and administer the operating tests in accordance with ES-301 and ES-302 of NUREG-1021. In order to conduct the requested operating tests, it will be necessary for your staff to make the simulation facility available on the dates noted above. Your staff should retain the original simulator performance data (e.g., system pressures, temperatures, and levels) generated during the dynamic operating tests until the examination results are final.

11/10

DEC 21 1993

ES-402, Attachment 2, and ES-302, Attachment 1, contain a number of NRC policies and guidelines that will be in effect while the written examination and operating tests are being administered.

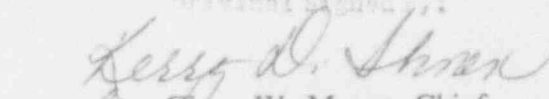

Your staff should submit preliminary reactor and senior reactor operator license applications and waiver requests at least 30 days before the first examination date so that the NRC will be able to review the applications and the medical certifications and evaluate any requested waivers. If the applications are not received at least 30 days before the examination date, a postponement may be necessary. Final, signed applications certifying that all training has been completed should be submitted at least 14 days before the first examination date.

This request is covered by Office of Management and Budget (OMB) Clearance Number 3150-0101, which expires October 31, 1995. The estimated average burden is 7.7 hours per response, includes gathering, xeroxing, and mailing the required material. Send comments about this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Information and Records Management Branch, MNBB-7714, Division of Information Support Services, Office of Information Resources Management, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555; and to the Paperwork Reduction Project (3150-0101), Office of Information and Regulatory Affairs, NEOB-3019, Office of Management and Budget, Washington, D.C. 20503.

Thank you for your consideration in this matter. Mr. Niedzielski has been advised of the NRC guidelines and policies addressed in this letter. If you have any questions on the evaluation process, please contact me at (215) 337-5211.

Sincerely,

Original Signed By:

  
Glenn W. Meyer, Chief  
PWR Section  
Operations Branch  
Division of Reactor Safety

Mr. Robert E. Denton
