Monticello Nuclear Generating Plant  
Docket No. 50-623 License No. DPR-22

Effluent and Waste Disposal Semiannual Report  
for January 1, 1990 through June 30, 1990

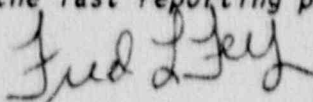

In accordance with the Monticello Technical Specifications, Appendix A to Operating License DPR-22, we are submitting the Effluent and Waste Disposal Semiannual Report covering the first half year of 1990.

Analyses for isotopes Sr-89 and Sr-90 for the second quarter were not completed in time to be included with this report. These analyses results are not expected to significantly change the computed off-site doses and will be included with the next semiannual report.

Enclosed with the report is an amended Effluent and Waste Disposal Semiannual Report for the second half year of 1989, which includes the previously omitted fourth quarter analyses results of Sr-89 and Sr-90.

The ODCM has been revised during this reporting period. A copy of the ODCM, Revision 7, has been included. A descriptive summary of the changes may be found in the ODCM under the Record of Revision.

A PCP has also been included with this report. This change occurred prior to the last reporting period, however it was not included with the last report.

  
Fred L. Fey, Manager  
Nuclear Radiological Services
