Subject: McGuire Nuclear Station
Lake Norman: 1992 Summary Report
Maintenance Monitoring Program
File: MC-702.13

Dear Mr. Tedder:

Enclosed is a copy of the annual Lake Norman environmental summary report for 1992, as required by NPDES permit NC0024392 for McGuire Nuclear Station. This report includes detailed results of the first year of the on-going cooperative study with NCWRC to radio tag striped bass and track their movement through summer 1993 in Lake Norman. As discussed with NCDEHNR biologists when we met in April 1993, we believe this sampling will better identify critical summer striped bass habitat in Lake Norman and address concerns about the striped bass habitat and population in Lake Norman expressed following your review of the 1991 annual summary report.

If you have any questions concerning this report, please contact Norma Atherton (704-875-5963), John Carter (704-875-5954 or me (704-875-5968).

Sincerely,

Ronald E. Lewis, Scientist
