

Dear John,

Nuclear Science, and in time its technical development, is the long term future for U.S. and World energy needs. We believe the use of Atomic Power requires the Americas to improve and expand our involvement in projects such as the enrichment program proposed for the Claiborne Parish in Louisiana.

We hope that the impact statement presented to the N.R.C. be accepted at the earliest date. It appears to be an exceptional, carefully crafted proposal.

Yours truly

Robert E. Foster DMD, M.S.,
