License Nos. R-66, R-123

University of Virginia
ATTN: Dr. R. U. Mulder, Director
Reactor Facility
Charlottesville, VA 22901

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-62/93-06

This refers to the inspection conducted by J. L. Kreh of this office on December 15-17, 1993. The inspection included a review of activities authorized for your research reactor facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Within the scope of the inspection, no violations or deviations were identified. However, the inspection disclosed that you had not yet revised your Emergency Plan and its implementing procedures to address the concerns identified by the December 1992 Reactor Safety Committee audit (see Paragraph 4 of the enclosed report). We encourage you to provide a level of management attention sufficient to achieve timely resolution of these audit concerns.

In accordance with 10 CFR 2.790(a), a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,

ORIGINAL SIGNED BY
WILLIAM E. CLINE
