SUBJECT: NRC INSPECTION REPORT 50-458/94-02

This refers to the inspection conducted by Mr. A. D. Gaines, and the inspectors identified in the enclosed report, of this office on January 3-7, 1994. The inspection included a review of activities authorized for your River Bend Station facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The results of this inspection are documented in the enclosed report.

We note that person-rem exposure at River Bend continues to be high. We encourage your efforts to address this matter such as the source term reduction efforts and increased emphasis on ALARA initiatives. Continued management attention to address this matter over the long term appears warranted.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Dwight D. Chamberlain
Acting Director
Division of Radiation Safety
and Safeguards
