Docket No. 50-309

Mr. John H. Garrity, Senior Director
 Nuclear Engineering and Licensing
 Maine Yankee Atomic Power Company
 83 Edison Drive
 Augusta, Maine 04336

Dear Mr. Garrity:

The Commission has issued the enclosed Amendment No. 61 to Facility Operating License No. DPR-36 for the Maine Yankee Atomic Power Station. This amendment consists of changes to the Technical Specifications (TS) in response to your applications dated April 12, 1982 and May 21, 1981, as supplemented on December 11, 1981.

This amendment changes the Technical Specifications to increase the required number of operable safety injection actuation signal sensors. This amendment also changes the TS, in the area of administrative controls, to indicate the establishment of a separate training department and other organizational changes.

Copies of the Safety Evaluation and the Notice of Issuance are also enclosed.

Sincerely,

Original signed by:

Christian C. Nelson, Project Manager
 Operating Reactors Branch #3
 Division of Licensing

Enclosures:

1. Amendment No. 61 to DPR-36
