SUBJECT: Peach Bottom Atomic Power Station, Units 2 and 3
Limited Senior Reactor Operator License Examinations

Dear Mr. Martin:

This letter is to document a change in schedule for the administration of the Limited Senior Reactor Operator (SRO) License "Difference" examinations for the Peach Bottom Atomic Power Station (PBAPS). By letter dated July 5, 1990, Philadelphia Electric Company (PECo) requested that the Limited SRO License "Difference" examinations for PBAPS be conducted during the week of November 26, 1990. NRC letter dated September 19, 1990 confirmed this date. The candidates for the PBAPS Limited SRO License examinations currently hold SRO Licenses limited to fuel handling for the Limerick Generating Station (LGS), and are presently engaged in their license responsibilities during the third refueling outage for LGS, Unit 1. Changes within the LGS outage schedule have resulted in time constraints which impact the administration of the PBAPS Limited SRO License examinations as currently scheduled. Therefore, rescheduling the administration of the PBAPS examinations for the week of December 17, 1990 was discussed in a telephone conversation with Mr. S. Pullani on October 10, 1990 and was found to be acceptable to the NRC Region I. Based upon successful completion of the PBAPS examinations, we request that the SRO Licenses limited to fuel handling for PBAPS be issued by January 18, 1991, the current scheduled start date for offload of the PBAPS, Unit 2 core.

If you have any questions, please do not hesitate to contact us.

Sincerely,

G. A. Hunger, Jr.
