The Honorable Nunzio Palladino, Chairman
Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Chairman:

The Center for Development Policy feels that the Nuclear Regulatory Commission has ignored important new information about the proposed Clinch River Breeder Reactor. The public must be informed of circumstances which have arisen since 1977, including changes in the CRBR design, NRC regulations and the implications of Three Mile Island.

We ask you (1) to issue a draft supplement to the Final Environmental Impact Statement for the CRBR and (2) to circulate it to the Center for Development for comments. Thank you.

Sincerely,

Virginia B. Foote
