Mr. Charles E. MacDonald, Chief  
Transportation Branch  
Division of Material and Fuel Cycle  
Licensing  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. MacDonald:

TVA hereby requests an amendment to Radwaste Shipping Certificate of Compliance No. 9139, Revision 1. We request item 5(b)(1) of the certificate be deleted.

The subject cask is to be used for transporting low specific activity (LSA) material. Item No. 5(b)(1) of the certificate of compliance requires that the contents be solidified or placed in a Department of Transportation specification 7A secondary container. Based on the fact that this cask is a Type A package and that only LSA material in sealed liners will be transported in it, we request that you remove this condition from the certificate.

In accordance with 10 CFR 170.11(a)3, an amendment fee is not required.

If you have any questions regarding this application, please get in touch with P. J. Hammons of my staff at FTS 858-2736.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
