Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 47-00404-02/90-01

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by Ms. S. Waldron on September 13, 1990. At the conclusion of the inspection, the findings were discussed with Mr. R. Hickman, Vice President of Patient Services. The findings were also discussed in a telephone conversation between Ms. Waldron of this office and you on September 18, 1990. A Confirmation of Action Letter was sent to you on October 1, 1990.

The inspection was an examination of activities conducted under your license with respect to radiation safety and compliance with NRC regulations and the conditions of your license. It included selective examinations of procedures and representative records, interviews with personnel, and direct observations by the inspector.

The inspection findings indicate that certain activities appeared to violate NRC requirements. The apparent violations described in the enclosed Inspection Report are under consideration for escalated enforcement action. Accordingly, a Notice of Violation is not being issued at this time, and a response to this letter is not required. However, please be advised that the number and characterization of apparent violations described in the enclosed Inspection Report may change as a result of further NRC review. An Enforcement Conference to discuss these issues has been scheduled for October 10, 1990. You will be advised by separate correspondence of the result of our deliberations on this matter.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
