Secretary of the Commission
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Secretary,

I AM WRITING TO express my concern ABOUT THE proposed plant life extension Rules currently being considered. Primarily, I am worried that the issuance of extensions to plants may be a rash decision that potentially could result in great tragedies. Safety, not the discussion thereof, needs to be your primary task, as well as that of every operator of a Nuclear facility. Only vigilant observation & studied, objective analysis of conditions of plants & their original licenses can insure the safety & welfare of the American people & land.

I urge you to reconsider the implementation of these extensions & hope that you will act as a regulator and not promote.

Sincerely,
Peter J.P. DiNardo
