U.S. Nuclear Regulatory Commission
Document Control Desk
Washington DC 20555

Gentlemen:

Licensee Event Report No. 90-15, Revision 1 attached. The original submittal of this report detailed a condition in which calculated Control Room temperatures could have exceeded their design limit under certain accident conditions. In that report, Portland General Electric Company stated the preliminary calculations, which formed the basis for the report, would be finalized and the results presented in a supplement. This revision to Licensee Event Report 90-15 presents those results.

Sincerely,

W. R. Robinson
General Manager
Trojan Nuclear Plant

c: Mr. John B. Martin
Regional Administrator, Region V
U.S. Nuclear Regulatory Commission

Mr. David Stewart-Smith
State of Oregon
Department of Energy

Mr. R. C. Barr
USNRC Resident Inspector
