Washington, DC 20555

Gentlemen:

Subject: Renewal of U.S. NRC License STB-1129

Attached is completed form NRC-2 and supplemental information for your review in considering renewal of the subject license which expires August 31, 1982. Also enclosed is a check for \$70.00 covering the license renewal fee.

The overall program remains the same as that outlined to you in previous license application and amendment requests. Some minor changes have occurred and they are outlined in attachments to NRC-2. Most production activities are now being conducted at 3M's Chemolite Plant in Cottage Grove, Minnesota and 3M's Menomonie, Wisconsin Plant. Only minor operations are now being conducted in Building 219. No operations are presently conducted or are planned to be conducted in Building 208 as outlined in previous license applications.

Should you have any questions concerning this license renewal application please refer them to Duane C. Hall of this office at 612/733-7316.

Sincerely,

*Robert G. Wissink*
