Inspection Summary: Inspection conducted May 24-28, 1982 (Combined Inspection Report 50-245/82-11 and 50-336/82-11)

Areas Inspected: Security Organization (Management, Personnel, Response); Records and Reports; Testing and Maintenance; Locks, Keys, and Combinations; Physical Barriers (Vital Areas); Security System Power Supply; Access Control (Personnel, Packages, Vehicles); Detection Aids (Protected Area, Vital Areas); Alarm Stations; Communications; Followup on Inspector-identified Problem; and Followup on Violations. The inspection began during non-regular hours and involved 40 hours onsite by one Region-based inspector; 4 hours were conducted during off-shift periods.

Results: No violations of NRC requirements were noted. A deviation was identified which involved the licensee's failure to meet a commitment made to the Commission.
