Subject: Correction to limits and storage location

Gentlemen:

Enclosed are six copies of revised page 5 of IRT document IRT 4171-013, "Application for Renewal of Special Nuclear materials License 1405". The revision reduces the possession limit for item E to 32 grams, and specifies that item B may also be stored at our facility at 3030 Callan Road. This is in concert with our present inventory and storage location.

This should be the last needed change to the latest amendment request.

If you have any questions or need further information, please call me at (619) 450-4343, extension 450.

Thank you.
