Docket Nos. 50-502

50-502

MEMORANDUM FOR: Distribution

FROM: Robert Capra, Licensing Project Manager, Light Water
Reactors Branch No. 3, DPM

SUBJECT: GENERAL INFORMATION ITEMS APPLICABLE TO THE TECHNICAL
REVIEWERS ASSIGNED TO THE HAVEN NUCLEAR PLANT

Effective 09/28/78, the Haven Nuclear Plant safety review was reassigned from Robert Stright to me.

Wisconsin Electric Power Company has sent a letter to the NRC stating that they will amend their application for a construction permit to build a single unit nuclear power plant at the Haven site. I anticipate that the amendment when received will cause only minor readjustments in your review.

Based on the schedule by which we have been conducting the review up to this time, I have submitted all Round One Questions to the applicant with the exception of the Structural Engineering Branch. For your information, the following is a summary of the major milestones in the review:

Applicant's Response to Q-1's	11/09/78
Formal Staff Positions to LPM	01/19/79
Applicant's Response to FSP	03/23/79
SER input to LPM	05/18/79
SER issued	08/01/79

Since the Haven plant is a replicate of the Koshkonong plant, all questions to the applicant have used the old numbering system for continuity. Enclosure 1 is a cross-reference list which shows the old and new numbering system. You will need this cross-reference when the applicant's responses are received. In addition, Enclosure 2 is a copy of the Round One Questions, applicable to your branch, which have been transmitted to the applicant.
