

UNITED STATES NUCLEAR REGULATORY COMMISSIONDOCKET NO. 50-213CONNECTICUT YANKEE ATOMIC POWER COMPANYNOTICE OF ISSUANCE OF AMENDMENT TO FACILITY  
OPERATING LICENSE

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 29 to Facility Operating License No. DPR-61, issued to Connecticut Yankee Atomic Power Company (the licensee) which amended the license and its appended Technical Specifications for operation of the Haddam Neck Plant (the facility) located in Middlesex County, Connecticut. The amendment is effective as of its date of issuance.

The amendment deletes License Condition C.(3) issued in Amendment No. 26, dated May 26, 1978, which prohibited operation beyond 300 Effective Full Power Days in Cycle 8 until a main steam line break reanalysis could be performed to support operation without automatic boron injection from the charging pumps in the event of loss of off-site power. The amendment also revises the Appendix A Technical Specifications to incorporate the appropriate assumptions used as input conditions for the main steam line break reanalysis.

The license amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.
