Memorial Hospital
ATTN: Mr. Patrick Miller
Administrative Director
615 N. Michigan St.
South Bend, IN 46601-9986

License No. 13-18881-02
Docket No. 030-19173

Gentlemen:

This refers to the routine safety inspection conducted by Ms. T. L. Simmons of this office on September 20, 1990 of activities authorized by NRC Byproduct Material License No. 13-18881-02 and to the discussion of our findings with you, Drs. P. Schnieder and A. Devata at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions taken regarding apparent violations found during our June 15 - October 26, 1989, inspection. We have no further questions regarding these matters.

During this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC Public Document Room.

The responses directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

William H. Schultz, Chief
Nuclear Materials Safety
