Federal Emergency Management Agency

Washington, D.C. 20472

JUN 15 1990

Mr. James M. Taylor
Executive Director for Operations
U.S. Nuclear Regulatory Commission
Washington, DC 20555

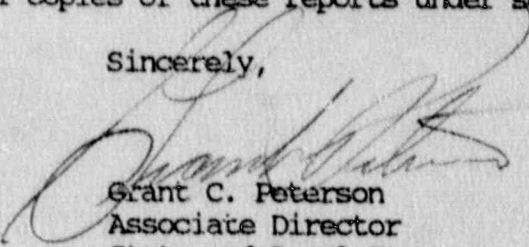

Dear Mr. Taylor:

This is to transmit the enclosed two reports updating materials included in the Federal Emergency Management Agency's (FEMA) December 1988 consolidated finding on the Seabrook Nuclear Power Station. The first report is the May 1990 Review and Evaluation of the Seabrook Plan for Massachusetts Communities (SPMC). This report updates the December 1988 Review and Evaluation of the SPMC. It is based on Revision 1 (December 1989) of that plan. The evaluation continues to support FEMA's finding that the SPMC is adequate to protect the health and safety of the public living in the Massachusetts portion of the Seabrook Emergency Planning Zone, by providing reasonable assurance that appropriate protective measures can be taken offsite in the event of a radiological emergency and are capable of being implemented.

The second report is the May 1990 Findings and Determinations for the Seabrook Nuclear Power Station. This updates the December 1988 Findings and Determinations for the Seabrook Nuclear Power Station, and reflects FEMA's updated plan review reports on the New Hampshire Radiological Emergency Response Plan, Revision 3, and the SPMC, Revision 1.

If you have any questions, please feel free to contact me on 646-3692. We will be forwarding additional copies of these reports under separate cover.

Sincerely,

Grant C. Peterson
Associate Director
State and Local Programs
and Support
