RE: License No. 48-25915-01MD
Docket No. 030-30566

Dear Mr. Schultz,

This is in response to your Notice of Violation letter dated 10-02-90.

ITEM #1 -

RESPONSE #1: Although they were conducted in a 18 month period instead of the required 12 months, the Safety Audit Team of our former company, did complete four audits. In as much as these audits were required for the first year only, there are no corrective steps to be taken. I think the promptness and thoroughness of subsequent managerial audits attests to our commitment to self inspection and safety.

ITEM #2 -

RESPONSE #2: What is missing in regards to action level and investigation level exposures is written documentation of the investigation and action taken. Investigations were conducted and discussed with the individuals involved. Action was taken to reduce exposure. It is reportable exposures that require written reports. None of the incidents cited were reportable, but to alleviate any confusion in the future we will document any investigational or action level exposures. This will be implemented by December 31, 1990.

ITEM #3 -

RESPONSE #3: On the March 30, 1990 linearity it states that the last previous linearity performed was done on December 18, 1989. The December 27, 1989 audit made no mention of a missing linearity. However, the March 1990 audit did mention a missing linearity. All evidence points to a lost report rather than a linearity not performed. Future filing will be done when the information is entered.

Sincerely,

A handwritten signature in cursive script that reads "James Pancy".
