ELECTRIC ENGINEERING  
DEPARTMENT

Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Attn: Mr. Robert W. Reid, Chief  
Operating Reactors Branch No. 4  
Division of Operating Reactors

Subject: Calvert Cliffs Nuclear Power Plant  
Unit No. 1 & 2, Docket No. 50-317 & 50-318  
License Amendment Fee

Reference: BG&E letter dated 11/13/78 from Lundvall to  
Denton, Request for License Amendment

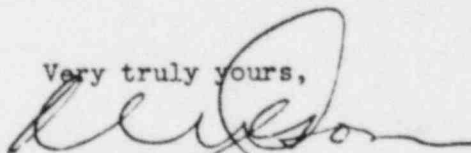

Gentlemen:

The referenced letter forwarded a set of eleven proposed changes to the Unit Nos. 1 and 2 operating licenses. We have made the determination that the requested changes constitute Class IV and Class I amendments. This determination was made as follows:

The eleven changes in the referenced letter each involve single issues which do not involve a significant hazards consideration, thus qualifying the request as a Class IV amendment. Since ten of the eleven changes apply equally to both Units of Calvert Cliffs, an additional classification of Class I is assigned to the request to account for a duplicate amendment to an essentially identical Unit at the same site.

In accordance with the above determination, we are hereby forwarding a check in the amount of \$12,700 pursuant to 10 CFR Part 170, paragraph 170.22. This amount corresponds to the combined fee for a Class IV amendment and a Class I amendment.

Very truly yours,

R. C. L. Olson  
Senior Engineer
